

A-list Awards Submission Guidelines

Eligibility

Interior design, architecture and landscape design professionals with projects in Connecticut OR have firms based in Connecticut are eligible to enter in any or all of our 17 categories.

Submission Process

To make the submission process as easy as possible with our **improved 2024 portal**, please note the following:

- **Preparation:** To simplify the submission process, we advise gathering all of your high-res project images and having your brief project descriptions ready to go *before* starting each submission. (We recommend using Microsoft Word to gather all of your project descriptions so you can easily cut and paste into each form.) A sample application can be provided upon request.
- **Entering multiple projects into one category:** While you may enter more than one project into a single category (and we encourage you to!), you must complete each submission before starting a new draft in the same category. Therefore, we advise having your images and project descriptions ready to go before starting each submission (see “Preparation” information above).
- **Use of information:** If your project(s) is selected as a finalist by our judging panel, the information you submit in your application will be used for all publicity and coverage related to the A-list Awards. Please fill out all required application information thoroughly. A sample application can be provided upon request.
- **File size:** For optimal viewing and printing, we require high-res project images that are a minimum of 1080 x 1920 pixels and 300 pixels per inch resolution.
